1996 challenger 787 4200 rpm problem | Sea-Doo Forum

I'm currently fixing my 1996 Seadoo Challenger with 787 carbored rotax engine. After I finished assembling the engine it was able to start easily and run on a low RPM smoothly. If I increase the RPM, the engine will go to approximately 5000, drop to 2000, go back to 5000, and drop to 2000 again. This cycle continues until I lower the RPM again.

I'm currently fixing my 1996 Seadoo Challenger with 787 ...

Problem with my Challenger 1800 | Sea-Doo Forum

Proper Tuning of Your Mikuni Carburetor. Proper carburetor setup and adjustment is essential for peak performance and longer engine life. The only good way to adjust the carbs is to take the craft to the water, but before you do that though, you need to know the basics of a Mikuni carb and what makes them tick.

[DOC] 1996 Seadoo Challenger Engine Problem

Was hoping to run it on the trailer and check for leaks. Went so well that we gradually increased to planing speeds. :) Sorry for the wind noise.

1996 SeaDoo Challenger - first day on new engine

Re: jet boat opinions 1996 seadoo. for a 12 year old boat with shot upolstery, the price is high. you will outgrow the size of the boat very quickly, there's BLING, but no space to move around. with the price of gas i would consider a propped boat. because with a jet drive, you loose 30-40% of the horsepower, in the conversion to the jet output, verses the output by a propped engine. in other words it's a 16 ft boat with 150hp jet drive which equates to a 16 ft boat, with a 115 outboard ...

1996 Seadoo Challenger Boats for sale - SmartMarineGuide.com

The right engine could be seized. Remove the plastic driveshaft cover and see if you can turn the engine over by hand without the plugs in the engine. If you can't turn the engine over by hand you have a seized engine. A rebuilt engine is around \$1400 bucks plus manhours to remove and install.

97 Sea Doo Speedster Jet Boat Please help engine problems ...

i have a 1996 seadoo challenger, with a single engine 787 rotax. the carbs have been rebuilt, along with the fuel pump. the craft starts up fine and idles good at 1500 rpm,in the water. it has good throttle response throughout the rpm range. the problem is that the hole shot is lugging before it gets on plane.i am running at about 6k rpm and 32mph.there is no miss upon accelleration and during fast accelleration, she gets up to 6k rpm right away.the low speed jet is set at 1 1/4 and the hi spd
