Realistic conflict theory dates back to the beginning of the 20th century as one of the earliest of social psychological theories regarding prejudice and discrimination. Realistic conflict theory proposes that intergroup conflicts arise between groups as they compete over the same limited resources. This is a possible cause of prejudice and discrimination development within a society.

A Realistic Theory Of Categories An Essay On Ontology

Realistic conflict theory, also known as realistic group conflict theory, is a social psychological model of intergroup conflict. The theory explains how intergroup hostility can arise as a result of conflicting goals and competition over limited resources, and it also offers an explanation for the feelings of prejudice and discrimination toward the outgroup that accompany the intergroup hostility. Groups may be in competition for a real or perceived scarcity of resources such as money, politica
