Electric Motor and Pump Sales and Repair | Suffolk County ...

Typically, a new motor winding should be dipped twice (double dip and bake) to ensure the varnish fully covers the windings. Many repair shops do not allow the windings to cool once they are cured in the oven after the first dip and before the motor is dipped a second time.

4 Types of Motor Winding Insulation Methods | Dreisilker ...

To check the condition of the armature windings, the armature will probably have to be removed from the motor. However, if the motor design has external brush holders, you can unscrew the brush caps and remove the brushes. Depending upon brush size, this may allow access to the commutator without removing the armature from the motor.
