E Kief

Kief is the term for the crystal-like formations on the bulbous tip of the resinous trichomes which give a cannabis plant its frosted appearance. The tip of the trichome is where the highest concentration of the psychoactive phytocannabinoid tetrahydrocannabinol (THC) is stored. Trichomes serve as a vital defense mechanism against herbivores.

Kief: Everything You Need to Know [And More]

Kief is a simple cannabis concentrate and doesn't involve much preparation or work at all. The easiest way to harvest kief is from bone dry buds that have been properly dried and cured. Wet and incorrectly dried flowers will not grind up as well, meaning the trichomes will be harder to remove.
