"Buy" them like any other Google Book, except that you are buying them for no money. Note: Amazon often has the same promotions running for free eBooks, so if you prefer Kindle, search Amazon and check. If they're on sale in both the Amazon and Google Play bookstores, you could also download them both.

JavaScript The Good Parts By
Considered the JavaScript expert by many people in the development community, author Douglas Crockford identifies the abundance of good ideas that make JavaScript an outstanding object-oriented programming language-ideas such as functions, loose typing, dynamic objects, and an expressive object literal notation. Unfortunately, these good ideas are mixed in with bad and downright awful ideas, like a programming model based on global variables.

Books By Douglas Crockford
In the process. "JavaScript: The Good Parts" defines a subset of JavaScript that's more reliable, readable, and maintainable than the language as a whole. Author Douglas Crockford, a member of JavaScript 2.0 committee at ECMA, is considered by many people in the development community to be the JavaScript expert.

JavaScript: The Good Parts: Amazon.co.uk: Douglas ...
Crockford's book, JavaScript: The Good Parts, says (on page 114) that constructor functions should always be given names with an initial capital letter (ie. Point), and that function names with initial capital letters should only be used with constructor functions (everything else should be lowerCase).

oop - JavaScript: The Good Parts - How to not use 'new' at ...
JavaScript: The Good Parts presents that most programming languages contain good parts and bad parts. Imperfections are difficult to remove from a language, so they are destined to stay in the language. The programmer is better off by leveraging on the good parts and avoiding features that are more trouble than they are worth.

Key takeaways from JavaScript: The Good Parts
The code listing on page 47 of Crockford's book Javascript - The Good Parts is missing a semicolon, namely: // Create a new object that inherits from the // constructor's prototype var that = Object.beget(this.prototype)
