Managing Protected Areas A Global
The widely accepted global definition of a protected area is 'a clearly defined geographical space, recognised, dedicated and managed, through legal or other effective means, to achieve the long term conservation of nature with associated ecosystem services and cultural values' (IUCN 2018). Based on this definition, protected areas can vary from Nature Reserves, to National Parks, to private conservancies and indigenous and community-managed sites; on land, sea and even in urban areas.

Managing Protected Areas - Global Wildlife Conservation

Managing Protected Areas: A Global Guide - Google Books

many protected areas worldwide were established for recreation as well as conservation; and as parks agencies like to remind us, managing park visitors commonly consumes far more of their staff time and budgets than managing natural resources. What, then, does this book

Managing Protected Areas: A Global Guide

One goal of global marine protected areas (MPAs) is to ensure they represent a breadth of taxonomic biodiversity. Ensuring representation of species in MPAs, however, would require protecting vast ...

Global marine protected areas to prevent extinctions ...

Protected areas are cultural artifacts, and their story is entwined with that of human civilization. Protecting places and resources is by no means a modern concept, whether it be indigenous communities guarding sacred sites or the convention of European hunting reserves. Over 2000 years ago, royal decrees in India protected certain areas. In Europe, rich and powerful people protected hunting ...
