TMS is being studied extensively across disorders and even disciplines with the hope that it will evolve into new treatments for neurological disorders, pain management, and physical rehabilitation in addition to psychiatry.

Transcranial magnetic stimulation (TMS): Hope for stubborn ...
Transcranial Magnetic Stimulation (TMS) is an increasingly accepted neurostimulation-based treatment for major depressive disorder. While there is a growing anecdotal database supporting its use in bipolar depression the investigators propose to collect open label efficacy and safety data in a small population of patients with clinically verified bipolar disorder.

An Open Label Trial of TMS Therapy for Bipolar Depression ...
Transcranial magnetic stimulation is a neuromodulation technique increasingly used to partly fill this therapeutic void. In the context of treating depression, we critically review the development of transcranial magnetic stimulation, focusing on the results of controlled and pragmatic trials for depression, which consider its efficacy, safety ...
